

Bioinformatics Mentorship Program

Launch Your Bioinformatics Research Career

July - September 2026

Apply by June 15, 2026

SWIPE >>>

WHY BMP?

Why This Program?

A proven track record of transforming research careers

3,000+

Researchers Trained

20+

Publications

5+

Years Mentoring

100%

Research Output

Your Mentor

Md. Jubayer Hossain

Founder & CEO, DeepBio Ltd

20+ publications | 3,000+ students trained since 2020

Every student works directly with me — not a TA or substitute — toward a concrete, submittable research output.

Is This For You?

- + Targeting MS/PhD programs (USA, Europe)
- + Building a bioinformatics research career
- + Ready to commit 10+ hrs/week
- + Want real research, not just certificates
- + Willing to tackle demanding research problems

- Casual learners or hobbyists
- Looking for shortcuts or guaranteed publications
- Unable to commit to 12-week intensive program

What You'll Master

12 weeks | 24 sessions | Production-grade skills

Wk 1-2

Linux, HPC & Slurm Cluster Management

Wk 3

Docker & Nextflow / nf-core Pipelines

Wk 4

Python & R for Bioinformatics

Wk 5

Variant Calling (GATK) & PLINK Analysis

Wk 6

RNA-seq & Differential Expression

Wk 7

Functional Analysis & Meta-Analysis

Wk 8-10

Single-Cell RNA-seq (Seurat, Scanpy, scVI)

Wk 11

AI Tools (Claude Code, Gemini CLI)

Wk 12

Deep Learning & Scientific Writing

INCLUDED

1 Complete Bioinformatics Roadmap

Career path for international academia & industry

3 Nextflow & Docker Mastery

Containerization & scalable workflow training

5 AI Productivity Training

Claude Code and Gemini CLI hands-on

7 Production-Quality Figures

Reproducible journal-ready visualizations

2 Reproducible Research Portfolio

End-to-end GitHub projects, production-grade code

4 Publication Pathway Guidance

Preparation for independent publication

6 Grad Program Readiness

Strategic prep for MS/PhD (USA & Europe)

8 Professional Certificate

Recognized for technical intensity & rigor

STRUCTURE

12

Weeks
Intensive

24

Expert-Led
Sessions

20

Maximum
Participants

10-12

Hours/Week
Independent Work

Investment: 10,200 BDT/month

8 hrs monthly sessions | Payment by 5th of each month

TESTIMONIALS

“

Transformative experience with technical skills and analytical mindset needed for complex datasets.

-- Naznin Akter

“

Turning point for my bioinformatics journey. Strengthened skills in R, transcriptomics, cancer bioinformatics.

-- Sabbir Khan

“

Getting full support and mentorship regularly, which brought my confidence level up.

-- Rahnuma Tabassum

“

The structured internship helped me understand principles of responsible research.

-- Kulsuma Bahar Bethi

3,000+ Mentees | 20+ Universities | 5+ Research Tracks

RESEARCH

2024

Scientific Reports

Pan-cancer analysis reveals immunological and prognostic significance of CCT5 in human tumors

2023

BMC Genomics

Meta-Analysis of Genomic Variants Using Integrative Computational Methods

2023

Scientific Reports

Comprehensive bioinformatics analysis reveals prognostic significance and immunological roles of WNT gene family in breast cancer

APPLY NOW

How to Apply

5 simple steps to join Cohort 02

Register

1

Submit application via website (no payment required)

2

Review

Applications evaluated for career alignment (7 days)

3

Info Session

30-minute fit check with shortlisted applicants

4

Payment

Payment link sent to confirmed participants

5

Cohort Start

Program begins July 2026

No application fee | Info session is 100% free

Financial hardship? Contact mentor directly

Ready to Launch Your Career?

Deadline: June 15, 2026

Limited to 20 spots

Apply: mdjubayerhossain.com/bmp
